

2025

+20 YEARS
+1000 COURTS/YEAR
+75 COUNTRIES

Since we began 20 years ago, we have produced more than 10,000 padel courts and installed them in more than 75 countries. We are part of the Atitlán Business Group, a family-owned company with a presence in various sectors, focused on creating and consolidating long-term value, headquartered in Valencia, Spain.

After our experience in official circuits, at Padel Galis we remain focused on elevating the game to its highest expression. Our main goal is to enhance the experience of both professional and amateur players by investing in development and innovation: Padel Galis, the players' court.

WILSON 90

WILSON 160

PPA

MUNDIAL 90

It is the panoramic padel court par excellence. Our classic model is distinguished by its uniform and simple design, fusing straight lines with great resistance thanks to its robust corner pillars. Perfect for any type of environment, making it the most versatile court.

Net strap	
Court exit	
Wind resistance	90KM/H 56 MPH

MUNDIAL 160

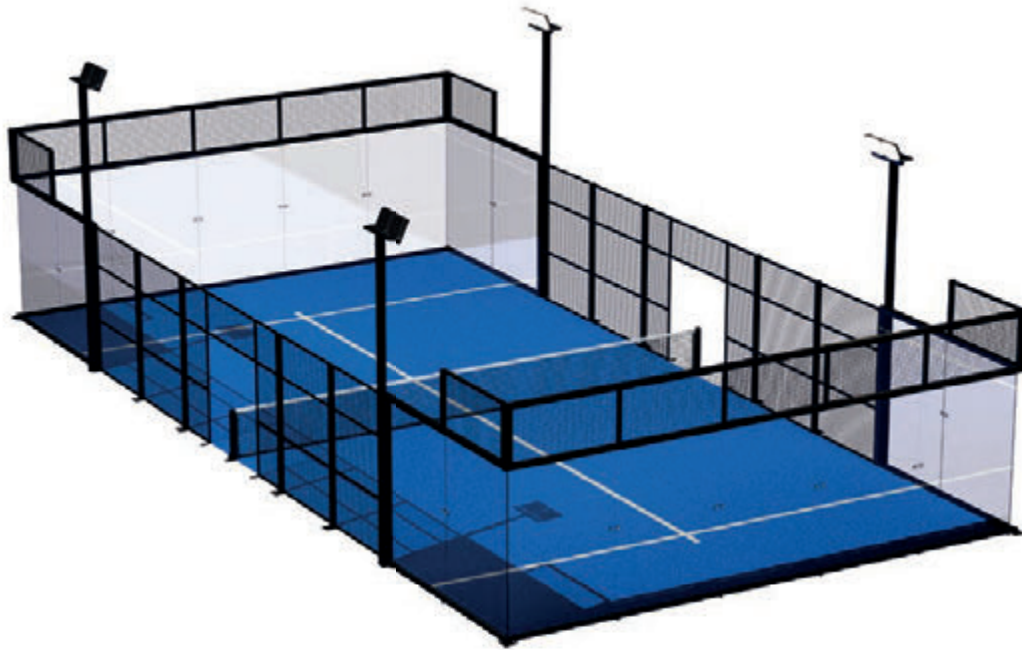

The Mundial 160 is the ultimate panoramic court, designed to withstand winds of up to 160 km/h without compromising stability and safety. Its reinforced structure, with robust corner pillars, guarantees exceptional resistance, while maintaining a uniform and elegant design. Perfect for any environment, it combines durability and aesthetics to offer an unparalleled playing experience with maximum visibility.

Doors	WITHOUT
Net strap	
Court exit	
Wind resistance	160KM/H 99 MPH

ATLAS

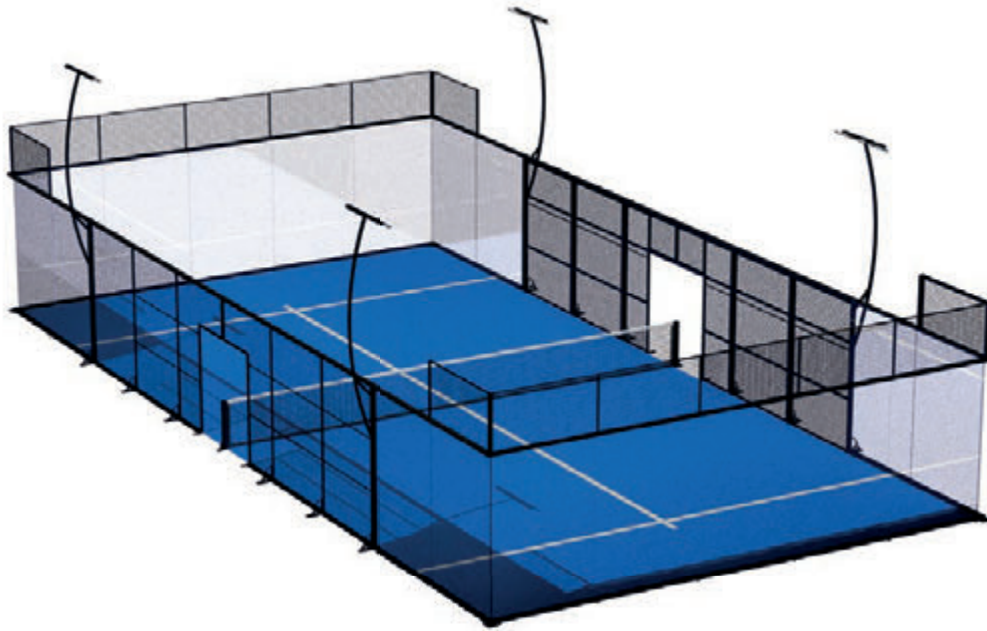

Atlas is our new model, an evolution of the iconic World-Mundial panoramic court. Without corner pillars, its design offers greater visibility and a clean aesthetic. Designed to transform the playing experience and adapt to any environment by combining elegance and functionality.

Model	ATLAS
Turf	PG5
Lighting	FILUX
Light pole	STRAIGHT
Doors	WITHOUT
Net strap	
Court exit	
Wind resistance	60KM/H 37 MPH

SPECIAL EDITION

Minimalist court model distinguished mainly by the absence of corner pillars. This singularity allows maximising the visibility of the spectators' game from different angles without any visual obstacle. Its design is characterised by a totally panoramic glazing providing a feeling of openness and connection with the environment.

Model	SPECIAL EDITION
Turf	PG5
Lighting	LED PROJECT
Light pole	CURVED
Doors	WITHOUT
Net strap	
Court exit	
Wind resistance	60KM/H 37 MPH

HURACAN

It is a court designed to cope with the most challenging weather conditions and withstand the most intense wind gusts. Its solid structure is characterised by a sturdy pillar at the back of the court, allowing the track to withstand winds of up to 260 km/h. This pillar can be personalised with the logo or name of the club.

Model	HURACAN
Turf	PG5
Lighting	FILUX

Wind resistance	260KM/H 161 MPH

WILSON 90

The WILSON 90 court emerges as the union between two companies passionate about promoting padel on a global level. Its corner pillars provide great resistance, as well as greater visibility. Its design is characterised by the incorporation of several Wilson customisations, as well as glossy paint finishes and the inclusion of premium lighting such as Galis 420 LEDs.

PPA

Padel Galis and the Professional Padel Association (PPA) have joined forces to create the new PPA padel court. Its distinguishing feature is the innovative perimeter light that guarantees an optimal vision, ensuring greater homogeneity of the lighting, as well as a reduction in energy consumption that can reach up to 50%. In addition, we highlight the detail of a tailor-made space in the posts to store the balls as well as the particularity of not having mesh covers while maintaining the safety of the players.

COMPLEMENTS

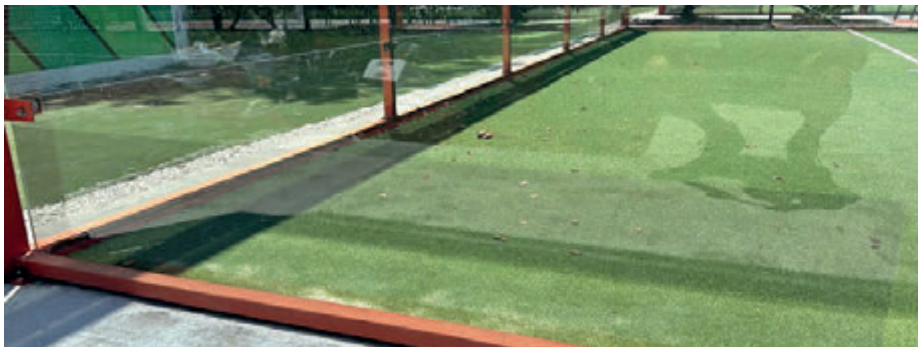

ANTI-BIRD GLASS

Bird-proof glass is an innovative and ecological solution designed specifically to avoid a risk to birds.

SOLAR VINYL

Solar vinyls are a practical and modern solution to optimize the use of paddle courts, especially in outdoor facilities or in environments with high sun exposure.

BENCHES

Benches on paddle courts are essential elements that provide comfort to players during breaks between sets or matches.

SUMMARY COMPARISON OF TURF TYPES

CHARACTERISTICS

MONOFILAMENT

TEXTURIZING

DESCRIPTION

Individual fibers produced without additional processing.

Monofilament subjected to a texturizing process where it curls.

DURABILITY

High as the fibers have not undergone additional processes.

Less than monofilament due to the wear produced in the fibers by the texturized process.

SPEED OF PLAY

Faster than textured turf surfaces.

Also fast play and more regular bounce, with less sand, suitable for high performance tournaments.

MAINTENANCE

Needs periodic brushing to level silica infills and less infill stability.

Less maintenance as its stability in terms of filling is higher.

AESTHETICS

More natural appearance.

More natural appearance with less visible infill.

RECOMMENDATIONS

Withstands weathering better, making it more suitable for outdoor installations.

Not recommended for outdoor use, mainly under extreme heat and high temperature variations.

ADVANTAGES

Durable, tough and highly resilient.

Superior silica filler stability.

DISADVANTAGES

Requires periodic brushing.

Lower durability.
